Oswaldo Mauro

Profiter Ai optimises the inventory management delivering more profit and more sustainability from online distribution.

As an algorithmic software, Profiter stands on top of the existing online distribution systems, channel managers and Revenue Management Systems that provide the product inventory, prices, availability and sales conditions to the online resellers such as OTAs, GDS and Wholesalers.

Oswaldo Mauro is specialized in: Artificial Intelligence, revenue management, hotel distribution technology, metasearch, digital marketing, international business development, startups, meta search marketing.
